User Reviews

Naogames

This review was submitted for a previous version of the package. Version: 2.0.2

Great asset and Awesome Developer !
(1 of 1 found this review helpful)

This is a really great asset, perfect for beginner...and also all devs who wants to publish really well structured games !
And what about the dev ?! He is awesome !! Really !

The c# code is very well commented and easy to modify. I published my very first game with it.
It's also easy to reskin.

the best part of this asset is definitely the support... incredible ! The dev is so responsive. That's simple, I always have response to my various questions within few hours, especially because we are not in the same time zone... Otherwise I'm sure it would be in a few minutes ;).
He is very helpful and really patient with me ;)

I highly recommend this asset and all of Indie Games Studio.
